

HexaQuilt Symphony

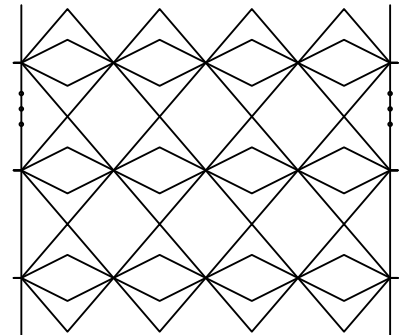

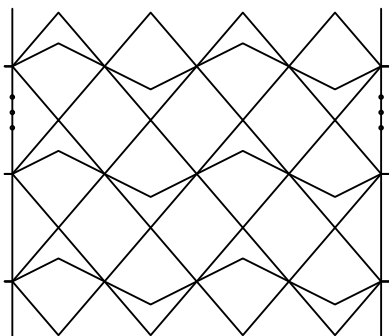

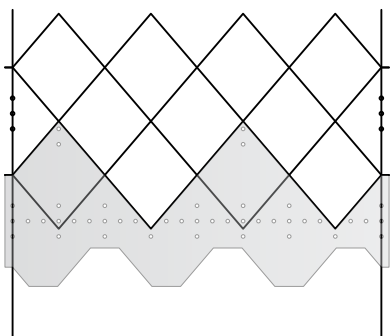

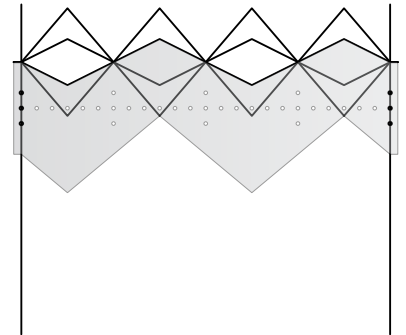

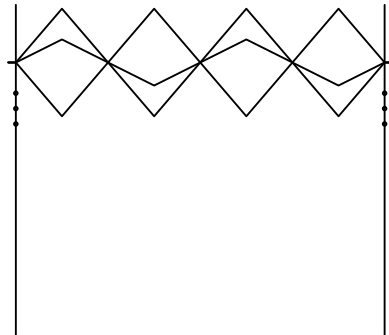

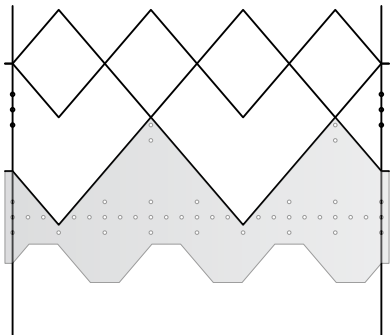

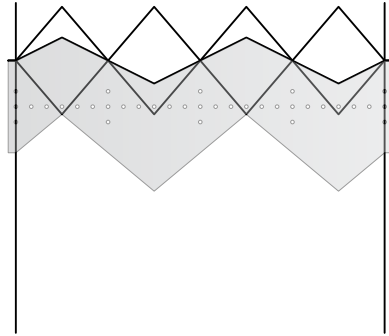

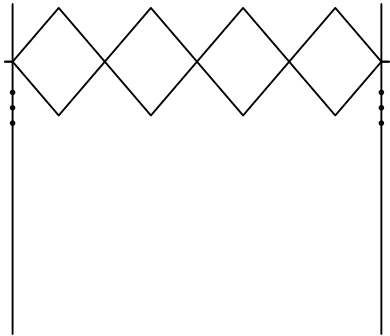

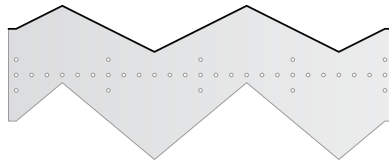

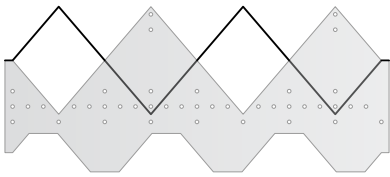

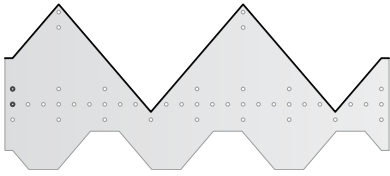

Hexagems

### Radiant Hexagons

#### Simple alignment steps:

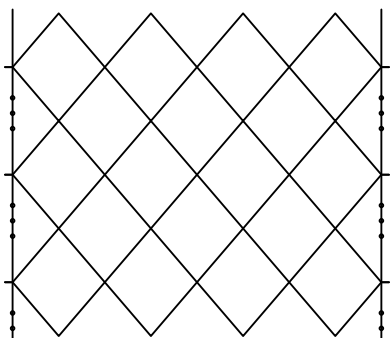

1. Choose a template and position it straight across your work piece.
2. Mark through the outermost hole/s as references.
3. Trace along the top edge to draw the contoured line.
4. Flip the template like the page in a book, aligning it with the reference dots.
5. Mark along the top edge to complete the design.
6. To repeat the pattern above or below, mark a straight line through the reference dots on each side and extend it up or down the work piece.
7. Position the template with the same outermost holes along this line, sliding it to meet the edge of the drawn lines.
8. Mark the design and additional reference holes, then flip the template like a book to complete the pattern.
9. Repeat until your work piece is marked with the repeating pattern.
